Harlem Heights Cultural Arts & Community Center "We Are Ready to Roll!"

The **Heights Foundation** held a "We Are Ready to Roll" event to kick-off re-starting construction of the long-awaited Cultural Arts & Community Center. Located in Harlem Heights, the 14,000 sf Community Center will offer a variety of programs and services to the neighborhood, including creative and performing arts programs, computer classes, and senior center. Construction is to resume the first week of July, with an estimated completion date of November 2012. The Cultural Arts & Community Center was designed by **GMA Architects & Planners**, engineered by **TDM Consulting**, and constructed by **Owen-Ames-Kimball**.

C & D Recycling Increases Sustainability

Two local recycling facilities have applied to **FDEP** to add Transfer Station and Material Recovery Facility to their existing facilities. Once permitting is approved, **USA Mulch** in Lee County and **Yahl Mulching & Recycling** in Collier County will be able to provide facilities to recycle Construction & Demolition debris. According to FDEP, construction & demolition debris accounts for 25% of Florida's municipal solid waste. The **USGBC** awards LEED points for developments utilizing C & D recycling, counting it as a significant commitment to sustainable building. For more information on permitting for C & D Recycling facilities, please contact **TDM Consulting**.

Coconut Cove 1 of 8 to receive LEED Platinum Certification

The **U.S. Green Building Council (USGBC)** awarded Coconut Cove in Cape Coral LEED Platinum Certification. The multi-family development is one of eight affordable housing projects to receive the honor. The LEED for Homes program is moving the residential market towards providing homes that are high-performing, healthy, and energy and cost efficient for the residents. Over half the LEED certified homes are in the affordable housing category. Coconut Cove was developed by **The Southwest Florida Affordable Housing Choice Foundation**, designed by **Moore & Spence Architects**, engineered by **TDM Consulting**, and constructed by **Owen-Ames-Kimball**.

Water Management on Barrier Islands presented by S.A.R.R.

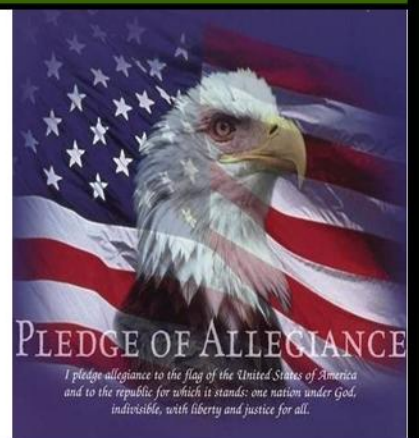

Dean Martin, P. E., LEED GA, was one of five guest speakers at the **Sanibel Alliance for Renewable Resources (S.A.R.R.)** meeting on June 7th at The Community House. The topic was "the utilization and management of water on a barrier island". The meeting was attended by members of the City Council, Planning Commission, representatives of the JN "Ding" Darling National Wildlife Refuge and Sanibel-Captiva Conservation Foundation, along with numerous residents. The S.A.R.R. is a non-profit organization created to help the business community, as well as residents, find ways to conserve energy, help the environment, and have as little impact on the ecosystem as possible.
